

Ex09 – Event Registration Web Application

Date: 05-05-2025

AIM

To design, develop, and deploy a web application for event registration.

DESIGN STEPS

Step 1:

Create a new frame in the design tool.

Step 2:

Select a preset size based on your project requirements.

Step 3:

Add the necessary shapes (buttons, forms, containers, etc.).

Step 4:

Import images or icons as required for visual enhancement.

Step 5:

Design and link multiple pages based on application flow (e.g., Login, Event List, Registration, Confirmation).

Step 6:

Validate both the HTML and CSS code for correctness and responsiveness.

Step 7:

Publish the website at the provided URL.

DESIGN TOOL

Figma
